

Assignment 1

CS590-CSC (Crowdsourcing and Social Computing), Fall 2018, Purdue University

Complete at least 3 different tasks on Amazon Mechanical Turk or Figure Eight to earn at least \$0.25.

1. For each task that you've completed, complete the following information.
 - Name of the task
 - Screenshot of the task interface
 - A brief description of what you have done in the task
 - The price of the task
 - The number of such task you've completed
2. For each task that you have completed, make a guess about why you are asked by the requester to solve that task. (i.e., what do you think your data in that task will be used for?)
3. For each task that you have completed, comment on your experience in that task. Do you like the way the task is designed? In your opinion, what are the strengths and drawbacks of the design of each task? (For example, is there anything in the task that you find confusing? Do you get enough time working in that task? Is there any part in the task that you think needs improvement?)
